Pigmented Lesions

Easel

Now Available in this Office!

Tired of those skin imperfections? Well... get rid of them!

- Your face, hands & arms are the first parts of the body to show signs of aging.
- Brown spots, freckles, liver spots & lentiginos are just a few of the marks referred to as pigmented lesions.
- 90-95% of these can effectively be removed with laser treatments.
- Minimal discomfort during and after the procedure.

Introducing laser removal of pigmented lesions.
For additional details, please consult with a member of our staff.
